SOCIAL

ABOUT

Software developer specialized in Java, C#, JavaScript and SQL development.
I have 4+ years of experience developing complex applications and had the opportunity to manage projects based on C#.
I'm looking to work with small or large teams in agile startup environments.

EXPERIENCE

FULL-STACK DEVELOPER

Netlearning Holdings. | Apr 2018 - July 2021

About
This company serves e-learning systems and develops everything in-house. I joined after graduating without experience in development.

Accomplishments
・I have managed and operated a platform for 5,500 companies with a cumulative total of 80 million learners, achieving and maintaining a completion rate of over 90% for my clients.
・Developed Japan's first service is linking IMS's Blockchains type Open Badge with the company's LMS in 4 months.
・As the leader of the maintenance team, I improved the response method and followed up with the support team, resulting in a 35% increase in productivity and a 40% decrease in the number of requests.
・Provided on-the-job training to both new graduates and mid-career workers, enabling them to join the company's operations within two weeks.

FREELANCE DEVELOPER

Some Clients. |July 2021 -

About
I worked for several companies.
For example, building Shopify, Web App development, Project management, etc.
